

# German Shepherd 24™

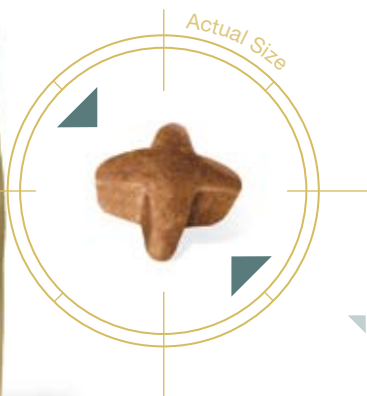

For German Shepherds over 15 months old

## Tailor-made nutrition for a courageous, dependable dog

### Did you know?

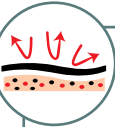

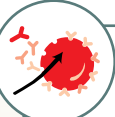

- German Shepherds have very alkaline skin, making them **more susceptible to skin infections**.
- In comparison with similar sized breeds, German Shepherds have **extremely fragile digestive systems**. This can lead to bloating and soft, wet stool.

### Specialized kibble for German Shepherds

- Custom X-shaped kibble helps with digestion by encouraging German Shepherds to slow down and chew.
- Kibble texture plus size, shape and density help fight plaque & tartar for healthy teeth and gums.

|  Specific Need                                                               | Nutritional Solution                                                                                                                                    | Benefit for German Shepherd                                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|
| <b>Extremely sensitive digestive system</b>                                                                                                                     | Promotes optimal digestion with ultra-digestible ingredients like brown rice and soy protein, plus beet pulp and prebiotics (MOS*).                     | Less indigestion, less bloating and firmer stool            |
|  <b>Susceptible to skin infections</b>                                       | Protects skin with omega 3 and a blend of vitamins & amino acids. Chelated copper & zinc help keep the coat healthy.                                    | Healthier skin and a beautiful coat                         |
|  <b>Working German Shepherds need strong immune defenses to stay healthy</b> | Boosts immune system with green tea polyphenols, vitamins E & C, lutein and taurine. MOS* (a prebiotic) stimulates production of protective antibodies. | Stronger immune system and protection against free radicals |

\*MOS – mannan-oligosaccharides
